SUSTAINABLE TRAILS+PATHS

Concrete trails help save the Planet.
Sustainable. Safe. Resilient. Durable.

CONCRETE

Always Gaining Strength, TOGETHER!

St. Charles County recently awarded bids for the construction of a bike-walk path. The project involves the construction of a multi-use path along West Meyer Road, Wentzville Parkway, and other roads in the county. The path will be approximately 10 feet wide and will include features such as truncated domes, concrete pavement, and signage. The project also includes the replacement of driveways and the installation of new signage and pavement markings.

It is anticipated that this project will utilize over 100 cubic yards of Concrete and is part of the continued use of Concrete construction in St. Charles and on trails and shared-use paths around the region. The Concrete Council has been promoting the use of Concrete pavement (or overlays) for trails and shared use paths for durability, coolness, long-term ADA compliance and other benefits.
